DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 1, 6 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. The phrase "all degrees of similarity" is indefinite because it is unclear and ambiguous which degrees of similarity are computed and what they represent. The applicant is suggested to clearly disclose which degrees of similarity are taken into account.

Allowable Subject Matter

4. Claims 1-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in the form that would overcome 35 U.S.C 112 2nd paragraph rejection as stated above.
5. The following is an examiner's statement of reasons for allowance:

As to claims 1, 6 and 9, the prior art fails to teach a document extracting apparatus and method wherein all degrees of similarity between the plurality of documents are computed and expressed in the form of symmetric matrix followed by

computing of sum of degrees of similarity between all of the documents that constitute each combination.

As to claims 2-5, 7,8, 10 and 11, those claims would be allowed by the virtue of their dependency on independent claims 1, 6 and 9 respectively.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- **Gomes et al (US Patent 6615209)** disclose a method for comparing two documents for the similarity.
- **Seki et al (US Publication 20020143737)** disclose an information retrieval device capable of comparing two documents and detecting repetitions.
